

REVISED CONTAINER OPTIONS for CIMCOOL® FLUIDS 265 Gallon Disposable Replaces Previous Disposable Container

1-WAY TRIP-LEASE 275 Gal

265 Gal (1000 liter) DISPOSABLE

Effective today, the “Disposable Container” volume will now be **265 gallons (1000 liter)**. All size, weight and shipping information remain the same. Product codes will remain the same, but the product container description will be changed to reflect the new volume. Container pricing will be revised to reflect the 265 gallon volume. This change is only for the “Disposable Container” configuration. The 1-Way Trip-Lease volume will remain at 275 gallons. Below are additional details:

What adapter do I need for the 265 Gallon Disposable? The DISPOSABLE Container has a butterfly valve assembly with an M60/6 buttress thread on it. A **REUSABLE DISCHARGE ADAPTER** is available for customers that may require a standard 2” cam lock connection. Customers should retain this REUSABLE ADAPTER. There will be no charge for the adapter until 12/31/09. After that date, a small fee will apply. Customers should order **PART # EQ00279 DISCHARGE VALVE ADAPTER**.

Is there an additional “up charge” of \$50.00 for the 265 gallon DISPOSABLE? No. This is an advantage over previous disposable containers.

Is there a special adapter required for the 265 DISPOSABLE to use a PROPORTIONER? Yes. Although rarely used with disposable containers, we can supply a **REUSABLE TOP FILL PORT ADAPTER** at no charge until 12/31/09. After that date, a small fee will apply. Customers should not discard these as they are reusable. The **TOP FILL PORT ADAPTER** reduces the cap opening to 2” NPT and includes a 2” NPT bung. Customers should order **PART # EQ00278 TOP FILL PORT ADAPTER** if they use a PROPORTIONER.

What is the code for the 265 Gallon DISPOSABLE when I order? B278 will still be the container designation for the 265 Gallon DISPOSABLE.

How much does the 265 Gallon DISPOSABLE weigh? The empty weight of the B278 is 120#. (The empty weight of the 1-WAY TRIP LEASE is 139#).

How big is the 265 Gallon DISPOSABLE compared to a 1-WAY TRIP LEASE? Both models are the exact footprint when packaging, frames and security straps are considered. (See above). The 265 gallon DISPOSABLE will be secured to a skid for easy handling, and will be plastic-wrapped to improve stability.
