PRODUCTION CLEANERS

APPLICATIONS

CIMCLEAN MA338 is a liquid cleaning compound and corrosion inhibitor used in high pressure production spray washers. It is intended primarily for use in removing coolants, machining fluids and honing oils from ferrous metal surfaces.

FEATURES & BENEFITS

CIMCLEAN MA338 is a non-foaming cleaner. It has been shown to defoam washers contaminated with foaming metalworking coolants. **CIMCLEAN MA338** solutions reject oil leading to enhanced washer cleanliness and extended solution life.

CIMCLEAN MA338 chemically imparts corrosion protection to metal surfaces without leaving a visible or tacky film. **CIMCLEAN MA338** produces no films to interfere with gauging. Surfaces cleaned with this product do not exhibit water spots.

CIMCLEAN MA338 is mildly alkaline, the concentrate having a pH of 10.1. The product is intended for use at concentrations of 2% to 4% by volume, and the pH of working solutions is in the range of 9.0 to 9.5.

CIMCLEAN MA338 is designed to be effective in washers operating at ambient temperatures and is immediately and completely soluble in cold water. Solutions are not affected by heat and will neither break down nor lose corrosion protection properties in washers operated at elevated temperatures.

CIMCLEAN MA338 is readily waste treatable.

TYPICAL PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Clear liquid
Odor: Mild
Specific Gravity: 1.12
Density: 9.5 Pounds per gallon
pH, concentrate: 10.1
pH, use dilution: 9-9.5
Flash Point: None
Use Dilution: 2-4%
Packaging: Available in 5 gal. pails, 55 gal. drums and bulk containers

Add no other substances to the concentrate or mix unless approved by CIMCOOL® Technical Services. For additional information concerning **CIMCLEAN® MA338** refer to its OSHA MSDS or contact CIMCOOL® Technical Services at 1-513-841-8133
