# CIMCOOL's CIPHERIAL 1072 Series: Metalworking Fluids Designed For Heavy Machining

**Cincinnati, Ohio—2013—** For heavy machining, the CIPHERIAL® line of soluble oils manufactured by CIMCOOL® Fluid Technology offers long fluid life, corrosion protection, high lubricity, low foaming characteristics and excellent rancidity control. The product line's 1072 series of fluids are designed for heavy-duty machining and grinding on both ferrous and non-ferrous metals and tested in the most challenging applications. For a free trial of one of the 1072 series, or any other CIMCOOL product, visit <http://www.cimcool.com/free-trial/> and complete the online form. 90% of customers who try CIMCOOL, stay with CIMCOOL!

**CIPHERIAL® 1072C** is a chlorinated soluble oil recommended for machining and grinding operations that offers good mix stability in high harness, high sulfate and high chloride water conditions.

**CIPHERIAL® 1072D** is a soluble oil recommended for machining and grinding operations on mild steels, stainless steels, hardened steels, exotics and most aluminum alloys.

**CIPHERIAL® 1072-HFP with FACT** is a premium soluble oil recommended for a wide variety of heavy-duty machining operations including turning, drilling, tapping, reaming, gear cutting and broaching. The CIPHERIAL 1072-HFP was developed for use in high fluid pressure applications.

CIPHERIAL metalworking fluids are always “machine friendly” and engineered to save money on storage, handling, mixing, charging, make-up and maintenance costs. Specialty formulations contain extreme pressure additives providing for enhanced machining and grinding performance capabilities in the most difficult applications.

All CIMCOOL products are backed with over 70 years of product performance.
