## ***Customers—Including Aerospace Manufacturers—Choose CIMCOOL<sup>®</sup> Because Of Product Quality, Customer Service***

**Cincinnati, Ohio—2011**— The consistent use of CIMCOOL<sup>®</sup> products by aerospace manufacturers and the growth in the market segment for the company attest to the trust that this industry puts in CIMCOOL Fluid Technology. Excellent products, backed by unparalleled customer service and guaranteed product performance, have earned CIMCOOL its reputation as a longtime technologies leader in the metalworking fluids industry.

With manufacturing and sales offices throughout the world, CIMCOOL is a leading global supplier of the most technologically advanced fluids available for use in many industrial operations, including aerospace manufacturing. The company offers a comprehensive family of products that meet stringent performance, health and safety requirements for machining, grinding, stamping, drawing and forming, especially in the aerospace industry.

- Cimtech<sup>®</sup> **320Z**, recommended for heavy-duty machining and grinding operations on non-ferrous or ferrous metals, has resulted in reduced waste, reduced cost of disposal, easy clean-up before welding, long-lasting service life and superior cooling and cutting performance for one government customer.
- A continuous use of **CIMPERIAL<sup>®</sup> 1070**, a premium soluble oil designed for moderate to heavy-duty operations for ferrous and nonferrous machining and grinding applications, provides great performance results for a New York-based aerospace interconnect provider. The company was so pleased with weekly concentration audits on nearly 150 individual sumps running this product that it recently converted its tool room area to **Cimtech 95** from a competitive soluble oil product.
- After using a competitive coolant for some time, an aerospace and defense manufacturer in the southeast and former CIMCOOL customer is switching back to **Cimtech<sup>®</sup> 315** in its aluminum manufacturing process. The metalworking fluid is recommended for heavy-duty machining and grinding operations on nonferrous or ferrous metals.

-continued-

CIMCOOL's dedication to customer satisfaction begins with its offer of a free product trial, and continues with a no-hassle product guarantee and round-the-clock internet support. Technical Reports and MSDS sheets, available at [www.cimcool.com](http://www.cimcool.com), offer complete product specifications and valuable trouble-shooting and problem-solving information for typical concerns that may be encountered with metalworking fluids.

CIMCOOL products—which include metalworking fluids as well as specialty lubricants, cleaners and corrosion inhibitors—are environmentally friendly, and each must pass rigorous standards set by the company's research and development lab before reaching market.

All CIMCOOL products are backed by the company's "no-hassle" performance guarantee and free trial assurance. For additional information on this and other CIMCOOL products, please visit our website at [www.CIMCOOL.com](http://www.CIMCOOL.com), and click on the MSDS and Product Information menu. CIMCOOL Fluid Technology is a global manufacturer of metalworking fluids. The company is certified ISO 14001, ISO 9001.

CIMCOOL, headquartered in Cincinnati Ohio, is a world supplier in metalworking fluid technology.
