CIMCOOL Introduces New Metalworking Fluid For Machining And Grinding Of Ferrous And Most Non-Ferrous Metals

Cincinnati, Ohio—2011— CIMCOOL Fluid Technology, which offers some of the most technologically-advanced fluids for use in industrial operations, has created **CIMSTAR 10-073M**, a semi-synthetic metalworking fluid developed for use on ferrous and most non-ferrous metals. **CIMSTAR 10-073M** can be used on mild steels, stainless steels, hardened steels, exotic materials and most aluminum applications. Designed for moderate duty machining and grinding applications such as milling, drilling, cut tapping, centerless, surface and ID grinding, the fluid includes physical and chemical lubricity additives and a unique combination of mineral and vegetable oils that provide excellent tool life and surface finish without the use of extreme pressure agents. CIMSTAR fluids typically contain a low to moderate amount of mineral oil and are semi-transparent when mixed with water. This product family is especially useful in applications that require long fluid life and cleanliness.

With products that boast results including up to 300% improved tool life; an increase in productivity; excellent rancidity control; greatly reduced concentrate usage; and operator-friendly use, **CIMCOOL Fluid Technology** is a leading global supplier of metalworking fluids that meet stringent performance, health and safety requirements for machining, grinding, stamping, metal-forming, cleaning, and many specialty applications that both satisfy customers' needs and set the standards for industry performance.

All CIMCOOL products are backed by the company's "no-hassle" performance guarantee and free trial assurance. For additional information, please visit our website at www.CIMCOOL.com, and click on the MSDS and Product Information menu. CIMCOOL Fluid Technology is a global manufacturer of metalworking fluids. The company is certified ISO 14001, ISO 9001.

CIMCOOL, headquartered in Cincinnati Ohio, is a world supplier in metalworking fluid technology. Visit our website at www.CIMCOOL.com.
