### ***CIMFREE® Botanical Fluids Are Environmentally Friendly***

Cincinnati, Ohio—2012—CIMCOOL Fluid Technology, a longtime industry leader in metalworking fluids technology, offers **CIMFREE Botanical Fluids**, a line of environmentally-friendly vegetable-based products for high-speed machining and metalworking operations. Having first pioneered the use of botanical lubricants decades ago, this product line expansion and the use of renewable resources continues CIMCOOL's longtime commitment to environmental conservation.

- **CIMFREE® VG-S175.** A vegetable-based "green" straight oil for grinding and machining of ferrous and non-ferrous metals, including copper and its alloys.
- **CIMFREE® VG-S110P.** This unique blend of vegetable and mineral oils is ideal for machining and grinding of ferrous and non-ferrous metals, especially in medical parts manufacturing.
- **CIMFREE® VG-MF5350.** Excellent for stamping and drawing applications that require a great deal of boundary lubrication, this product allows tight-radius applications, is easily washed from parts, and its lower viscosity makes application easier.
- **CIMFREE® VG-920M and VG-921M.** Economical concentrates with no mineral oil, nonylphenol ethoxylates or chlorine, these fluids can replace most semi-synthetic mineral oil products for general-purpose use, including ferrous and aluminum applications.
- **CIMFREE® VG-990M.** Recommended for a wide variety of medium-duty machining and grinding operations including turning, drilling, tapping and reaming. **VG-991M** is available for aluminum wire drawing applications.
- **CIMFREE® VG-901ZH.** Offers excellent lubricity for heavy-duty machining and grinding operations and contains no boron, nonylphenol ethoxylates, ethanolamines or chlorine.
- **CIMFREE® VG-703ES.** Designed for use in misting applications or other Minimal Quantity Lubrication (MQL) applications and appropriate for all ferrous metals and some aluminum.
- **CIMFREE VG®-945L.** Recommended for a wide variety of light to medium-duty machining and grinding operations including turning, drilling, tapping and reaming.
- **CIMFREE® VG3900H.** Recommended for general-purpose and high production machining and grinding of non-ferrous metals. It can also be used in some applications on ferrous metals.
