# CIMGUARD® 10 Prevents Corrosion From Fingerprints Or Water

**Cincinnati, Ohio—2013—** CIMCOOL® Fluid Technology, a leading global supplier of metalworking fluids that both satisfy customers' needs and set the standards for industry performance, offers **CIMGUARD 10**, a general-purpose solvent-based corrosion preventative that neutralizes fingerprint residues and protects ferrous and non-ferrous metals from corrosion.

**CIMGUARD 10** rapidly displaces water from metal surfaces leaving a continuous polar protective film—thin, transparent, colorless and slightly oily—between the metal and water. An organic rust inhibitor, CIMGUARD 10 can be applied to wet or dry parts through immersion, brushing, rolling or spraying. The product—which can be used with steel, cast iron, copper, zinc, aluminum and their alloys—is non-emulsifying, not harmful to conventional lubricating oils and greases, and non-staining to metals.

**CIMCOOL Fluid Technology** offers some of the most technologically-advanced fluids available for use in industrial operations with products that boast results including up to 300% improved tool life; an increase in productivity; excellent rancidity control; greatly reduced concentrate usage; and operator-friendly use.

All CIMCOOL products are backed with over 70 years of product performance. For additional information, please visit our website at [www.CIMCOOL.com](http://www.CIMCOOL.com), and click on the MSDS and Product Information menu. CIMCOOL Fluid Technology is a global manufacturer of metalworking fluids. The company is certified ISO 14001, ISO 9001. Pink Trade Dress is a registered trademark of Milacron LLC
