CIMPERIAL® 1072D Is Recommended Metalworking Fluid For Poor Water Conditions

Cincinnati, Ohio—2011— CIMCOOL Fluid Technology, a leading global supplier of metalworking fluids that both satisfy customers' needs and set the standards for industry performance, has introduced **CIMPERIAL® 1072D**, a soluble oil recommended for machining and grinding operations with poor water quality.

CIMPERIAL 1072D can be used in heavy to severe duty machining and grinding operations on mild steels, stainless steels, hardened steels, exotics and most aluminum alloys, including MIC® 6. The fluid has a good mix stability in high hardness, high sulfate, and high chloride water conditions. The extreme pressure lubricant provides excellent lubricity which extends tool and wheel life while providing superior part quality.

CIMCOOL Fluid Technology offers some of the most technologically-advanced fluids available for use in industrial operations with products that boast results including up to 300% improved tool life; an increase in productivity; excellent rancidity control; greatly reduced concentrate usage; and operator-friendly use.

All CIMCOOL products are backed by the company's "no-hassle" performance guarantee and free trial assurance. For additional information, please visit our website at www.CIMCOOL.com, and click on the MSDS and Product Information menu. CIMCOOL Fluid Technology is a global manufacturer of metalworking fluids. The company is certified ISO 14001, ISO 9001.

CIMCOOL, headquartered in Cincinnati Ohio, is a world supplier in metalworking fluid technology. Visit our website at www.CIMCOOL.com.
