CIMTECH 610® and MILFORM 610 are Innovative Metalworking Fluids Designed For Milling, Drilling, Stamping and Drawing.

Cincinnati, Ohio—2012—CIMCOOL, a long-time industry leader in metalworking fluid technology, offers **CIMTECH 610®**, an innovative metalworking fluid proven to be an exceptional product for milling and drilling aerospace and aluminum alloy material.

Featuring a hybrid blend of patented and synthetic lubricants, **CIMTECH 610** provides synergistic performance on difficult-to-machine ferrous and non-ferrous alloys without corrosion or stain. The product is uniquely formulated to be used on hard, brittle metals that “ordinary” fluids have difficulties with, such as Inconel, titanium, stainless steel, aerospace alloys and hardened steel. **CIMTECH 610** offers excellent heavy-duty performance without chlorine, sulfur or phosphorus EP lubricants; a near neutral pH; good corrosion control on ferrous metals and non-staining to aluminum and other exotic alloys. It works best in tough operations, is low-foaming, and provides good part visibility for operators.

MILFORM 610, is a water soluble stamping and drawing fluid for moderate-duty applications designed for use on ferrous and non-ferrous metals. **MILFORM 610** provides excellent lubricity and extreme pressure (EP) performance; it is non-staining on most yellow metals and aluminum, is very clean and washes off parts easily. **MILFORM 610** provides good microbial control as well as excellent tool and die life.

All CIMCOOL products are backed by the company’s “no-hassle” performance guarantee and free trial assurance. For additional information, please visit our website at www.CIMCOOL.com, and click on the MSDS and Product Information menu. CIMCOOL Fluid Technology is a global manufacturer of metalworking fluids. The company is certified ISO 14001, ISO 9001. Pink Trade Dress is a registered trademark of Milacron LLC
