## ***CIMTECH 610<sup>®</sup> Is Innovative Metalworking Fluid Especially For Milling And Drilling***

**Cincinnati, Ohio—2011**—CIMCOOL, a long-time industry leader in metalworking fluid technology, offers **CIMTECH 610<sup>®</sup>**, an innovative metalworking fluid proven to be an exceptional product for milling and drilling aerospace and aluminum alloy material.

Featuring a hybrid blend of patented and synthetic lubricants, **CIMTECH 610** provides synergistic performance on difficult-to-machine ferrous and non-ferrous alloys without corrosion or stain. The product is uniquely formulated to be used on hard, brittle metals that “ordinary” fluids have difficulties with, such as inconel, titanium, stainless steel, aerospace alloys and hardened steel. **CIMTECH 610** offers excellent heavy-duty performance without chlorine, sulfur or phosphorus EP lubricants; a near neutral pH; good corrosion control on ferrous metals and non-staining to aluminum and other exotic alloys. It works best in tough operations, is low-foaming, and provides good part visibility for operators.

All CIMCOOL products are backed by the company’s “no-hassle” performance guarantee and free trial assurance. For additional information about this and other CIMCOOL products, please visit our website at [www.CIMCOOL.com](http://www.CIMCOOL.com), and click on the MSDS and Product Information menu. CIMCOOL Fluid Technology is a global manufacturer of metalworking fluids. The company is certified ISO 14001, ISO 9001.

CIMCOOL, headquartered in Cincinnati Ohio, is a world supplier in metalworking fluid technology. Visit our website at [www.CIMCOOL.com](http://www.CIMCOOL.com).
