# Cleaning The Shop? Do The Job Easily And Affordably With CIMCLEAN® and PRODUCTO™ Products

**Cincinnati, Ohio—2012—** CIMCLEAN®—the product of choice among shop supervisors around the world—eliminates shop waste, metal swarf, oil, mold and bacteria in the most difficult manufacturing environments. The extensive line of cleaning products, designed to keep metalworking operations at peak performance, is manufactured by **Cimcool Fluid Technology**, a leading global supplier of the most technologically-advanced fluids available for use in industrial operations.

In at least one shop setting, **CIMCLEAN** products were tested against competitors' brands for cleaning stainless steel and carbon steel fuel injection parts. **CIMCLEAN** washed the parts better and left little, if any residue. By using **CIMCLEAN** products, the customer cut cleaning fluid usage in half, resulting in an annual savings of more than \$300,000.

**CIMCLEAN** products can be used in a wide variety of applications, including cleaning of parts, machines and floors, as well as other general purpose manufacturing and production cleaning. Available in mildly alkaline or highly alkaline solutions, all **CIMCLEAN** products are easy to use, versatile and appropriate for washers, spray, dip tanks, or ultrasonic applications.

- **CIMCLEAN® 30.** A general-purpose cleaner concentrate for use on individual machine and central system reservoirs, metalworking fluid lines, premix tanks, machines and parts. It effectively removes bio-films, dirt, grit, chip deposits, insoluble soaps, and oils from central systems and individual machine sumps. What's more, it contains corrosion inhibitors to protect machines and parts from rusting during the cleaning process.
- **CIMCLEAN® 30F.** A central filtration system and machine cleaner that improves rancidity control by removing bio-films, dirt, grit, chip-deposits, insoluble soaps and oils from central systems in hard water areas.

-more-

- **CIMCLEAN® 40.** A general-purpose machine, tank and system cleaner for use where the cleaner may contact aluminum.
- **CIMCLEAN® 50.** Recommended for cleaning individual machines and central system reservoirs, metalworking fluid lines, premix tanks, and parts and as an additive to improve sump life.
- **CIMCLEAN® MA 303.** A solvent emulsion cleaner, based on a light hydrotreated mineral oil.

CIMCOOL also offers **PRODUCTO™ MC-321**, an industrial strength water-based general purpose maintenance cleaner designed to remove grease, oil and dirt from machinery, floors, walls and other hard surfaces. The versatile **PRODUCTO MC-321** can be used in dip/immersion tanks, ultrasonic, low-pressure spray and spray and wipe applications. It cleans without agitation and has excellent rinsing properties. It can be diluted with water in any proportion depending on the severity of the cleaning, and will not clog cleaning equipment even at high concentrations.

As with all CIMCOOL products, **CIMCLEAN** and **PRODUCTO** products are backed by the company's "no-hassle" performance guarantee and free trial assurance. For additional information on this and other CIMCOOL products, please visit our website at [www.CIMCOOL.com](http://www.CIMCOOL.com), and click on the MSDS and Product Information menu. CIMCOOL Fluid Technology is a global manufacturer of metalworking fluids. The company is certified ISO 14001, ISO 9001. Pink Trade Dress is a registered trademark of Milacron LLC
