MILACRON'S CIMCOOL global industrial fluids introduces CIMGUARD 9C® - an all-in-one rust preventative, moisture sealant, cleaner and penetrating lubricant.

Cincinnati Ohio, May 2007 – MILACRON'S CIMCOOL global industrial fluids, a long time industry leader in metalworking fluids technology, has announced the release of its latest development –**CIMGUARD 9C®** - a light duty RP and solvent-type cleaner that cleans rusted equipment and loosens frozen parts and corroded bolts and nuts.

CIMGUARD 9C® is designed to prevent and remove rust and corrosion on both ferrous and non-ferrous parts. This product inhibits the formation of corrosion on metal surfaces that are susceptible to decay such as motors, pumps and metallic parts by locking out moisture and wetness. In addition to providing protection against equipment decay, this cost-effective penetrating oil lubricates squeaking hinges and slide mechanisms. CIMGUARD 9C® also acts as a cleaner removing rust and dirt from machine beds, chucks, ways, gears and internal machine parts.

CIMGUARD 9C® is fast drying and requires no mixing or measuring. It is easily cleanable with either solvent or light-duty alkaline cleaners. **CIMGUARD 9C®** is backed by the CIMCOOL “No-hassle” performance guarantee and free trial assurance.

Milacron, Inc. is a global leader in the design, manufacture and service of metalworking fluid technology. It is a leading supplier of fluid services, which support the metalworking industry, to manage metalworking fluids and reduce costs. It is certified ISO 14001, ISO 9001, ISO 9002 and ANSI/ASQ Q9001.
