CIMCOOL® Fluid Technology Announces CIMMILL™ FLUIDS for the TUBE and PIPE Industry

Cincinnati, Ohio—February, 2012—CIMCOOL Fluid Technology, the technology leader in metalworking fluids, introduces a new and complete product line designed to meet the challenges of the tube and pipe industry. **CIMMILL™** Fluids, formulated to increase productivity by up to 20% in tube and pipe operations, offer excellent lubricity, rust protection and sump life. Mills and processors will also experience excellent foam control, improved tool life and increased up-time during critical roll forming, cut off and threading operations. Increased productivity and trouble-free performance make **CIMMILL** Fluids uniquely qualified for tube and pipe operations.

“We have a history of success in tube and pipe operations, but our new **CIMMILL** Fluids are designed to significantly improve productivity. **CIMMILL** Fluids exceed key performance needs of tube and pipe mills while continuing our commitment to always provide operator-safe products,” said Bruce Koehler, Cimcool Product Manager. “There are products in the **CIMMILL** line that cover a wide range of applications including the most severe. Whether in roll-forming, hydro-testing or critical threading operations, there is a specific product designed to run cleaner and more efficiently. **CIMMILL** Fluids are better because they were designed to be safe, increase up-time and provide clean working conditions.”

CIMMILL Fluids can be ordered now. For additional information about these new **CIMMILL** Fluids, please call 1-888-246-2665 or visit our website at www.CIMCOOL.com; then click on the Tube and Pipe icon.
