MILACRON's CIMPERIAL® "Z" Products Innovate Soluble Oil Metalworking Fluids

Cincinnati Ohio, February 2006 – CIMCOOL, a long time industry leader in metalworking fluids technology, has announced the release of its latest development – the **CIMPERIAL® "Z" Fluids**. This recent addition to the comprehensive line of CIMCOOL products is sure to revolutionize the metalworking industry.

The CIMCOOL CIMPERIAL® line of soluble oil products is designed for heavy-duty machinery and grinding on both ferrous and non-ferrous metals. CIMPERIAL® offers long fluid life, corrosion protection, high lubricity, low foaming characteristics and excellent rancidity control. With all these benefits CIMPERIAL® is always "machine friendly" and engineered to save money on storage, handling, mixing, charging, makeup and maintenance costs. CIMPERIAL® fluids commonly contain extreme pressure additives providing for enhanced machining and grinding performance capabilities in the most difficult applications.

CIMCOOL has enhanced the CIMPERIAL® line of products with the introduction of the Advanced Technology "Z" Metalworking fluids. Three of the most versatile CIMPERIAL® fluids have been reformulated into "Z" line products: CIMPERIAL® 1060CFZ, CIMPERIAL® 1080CFZ and the CIMPERIAL® HD265Z. The "Z" fluids have been designed to provide many considerable benefits, including up to a 30% increase in sump life, up to a 40% improved tool life, an increase in productivity of at least 20%, along with excellent rancidity control and a greatly reduced concentrate usage. As with all CIMCOOL products, the new "Z" line is backed by the CIMCOOL "No-hassle" guarantee and free trial assurance.

Milacron, Inc. is a global leader in the design, manufacture and service of metalworking fluid technology. It is a leading supplier of fluid services, which support the metalworking industry, to manage metalworking fluids and reduce costs. It is certified ISO 14001, ISO 9001, ISO 9002 and ANSI/ASQ Q9001.
