Boeing Approves CIMCOOL CIMTECH[®] 320Z Metalworking Fluid

Cincinnati, Ohio—November, 2008—CIMCOOL Global Industrial Fluids announces **CIMTECH 320Z**, a low pH synthetic fluid has received Boeing BAC 5008RevR approval for Usage Areas 5 and 6 including Titanium Alloy applications.

CIMTECH 320Z is recommended for moderate to heavy-duty machining and grinding operations on non-ferrous or ferrous metals. **CIMTECH 320Z offers excellent rancidity control** resulting in extended sump life with minimal need for additives. It has the best **lubricity** in its class and provides superior tool life and outstanding surface finish. One of its best features is **excellent cleanliness**. It leaves a water-like residue that protects sensitive alloys from staining, but is easily removed. Further, it rejects tramp oil keeping the product clean which contributes ultimately to extended sump life. A mix of **CIMTECH 320Z is transparent**, offering machine operators unprecedented part visibility. Users will find it is non-irritating to skin, ultra low misting and non-smoking. The product provides **excellent machine and seal compatibility** and is very low foaming even when used with deionized water or in high fluid pressure applications. **CIMTECH 320Z** is easily recycled and **environmentally friendly**.

As with all CIMCOOL products, the new CIMTECH 320Z[®] technology is backed by the company's "no-hassle" performance guarantee and free trial assurance. For additional information on this and other CIMCOOL products, please visit our website at www.CIMCOOL.com and click on the MSDS and Product Information menu. CIMCOOL Global Industrial Fluids is a division of Milacron, Inc., a leading global supplier of plastics-processing technologies and industrial fluids. CIMCOOL Global Industrial Fluids is registered to ISO 14001, ISO 9001, ISO 9002 standards.

CIMCOOL, headquartered in Cincinnati Ohio, is the world leader in metalworking fluid technology.
